<b>Alert group</b>	<b>SQL injection</b>
Severity	High
Description	SQL injection (SQLi) refers to an injection attack wherein an attacker can execute malicious SQL statements that control a web application's database server.
Recommendations	Use parameterized queries when dealing with SQL queries that contains user input. Parameterized queries allows the database to understand which parts of the SQL query should be considered as user input, therefore solving SQL injection.
Alert variants	
Details	URL encoded POST input <b>filter_order</b> was set to <b>1A\$Aç%2527%2522</b>  Error message found: <div style="border: 1px solid black; padding: 2px;">Unknown column '125272522' in 'order clause'</div>
